# A HOTSPOT CLOUD
# free web-surfing
# 2 hours a day!

## Unlimited and free Wifi!

**Umbria Wifi** project has been financed by Umbria Regional Council, using **Regional Operative Programme 2007-2013 co-funded by the European Regional Development Fund (ROP ERDF)** ; it has been carried out by CentralCom SpA, in cooperation with **Perugia**, **Terni**, **Foligno**, **Città di Castello** and **Orvieto** City Councils.

**The service offers the possibility to free web-surf using wifi for 2 hours a day (not necessarily consecutive), through a simple online registration.**

The project aims at enhancing the value of the territory as well as at increasing the institutional websites and relevant services communication effectiveness, thanks to an easier access to local services information (i.e. mobility, tourism, health services, cultural and environ-mental heritage…), through smartphones, tablets, pc or other portable devices.

*The project is included within the Communication Plan of the Regional Operative Programme 2007-2013 co-funded by the European Regional Development Fund (ERDF) and can be qualified as a major information activity for the year 2013 in accordance with art. 7, comma 2, b), Reg. CE 1828/2006.*

As a result of a public tender, Tiscali Spa and Umbria Control srl created the network and currently manage it. Users can access to Umbria Wifi through a welcome page which allows them to identify the current hotspots, in the Cities participating in the initiative.

**Perugia network, made of 25 access points, provides a free web-surfing service in the main squares, libraries and public green areas.**

The proposed architecture allows the integration with federated identity systems, compatible with already active networks, located in other cities and regions in Italy. With the aim of extending the project, this operative model gives the possibility to other companies, both private and public, interested in activating Hotspots, within the Region, to join the initiative.

FREE WIFI 2h/DAY

Umbria Wifi

You can use the same password to free web-surf in all the City of Perugia access points and all the other towns joining the project!
Follow us on **www.umbriawifi.it**
and **www.fesr.regione.umbria.it**

## Web-surfing is really easy!

- Find the Umbria Wifi network with your smartphone, tablet or PC
- Insert your data into the welcome page
- You will immediately receive an sms with a password

- You will be able to connect in just a few seconds and to surf the net free of charge for a maximum of two hours daily (unnecessarily consecutive) at all the Umbria Wifi network hotspots!
